4% Chlorhexidine Gel (Navi Malam)

Use of 4% Chlorhexidine to prevent infection in newborn

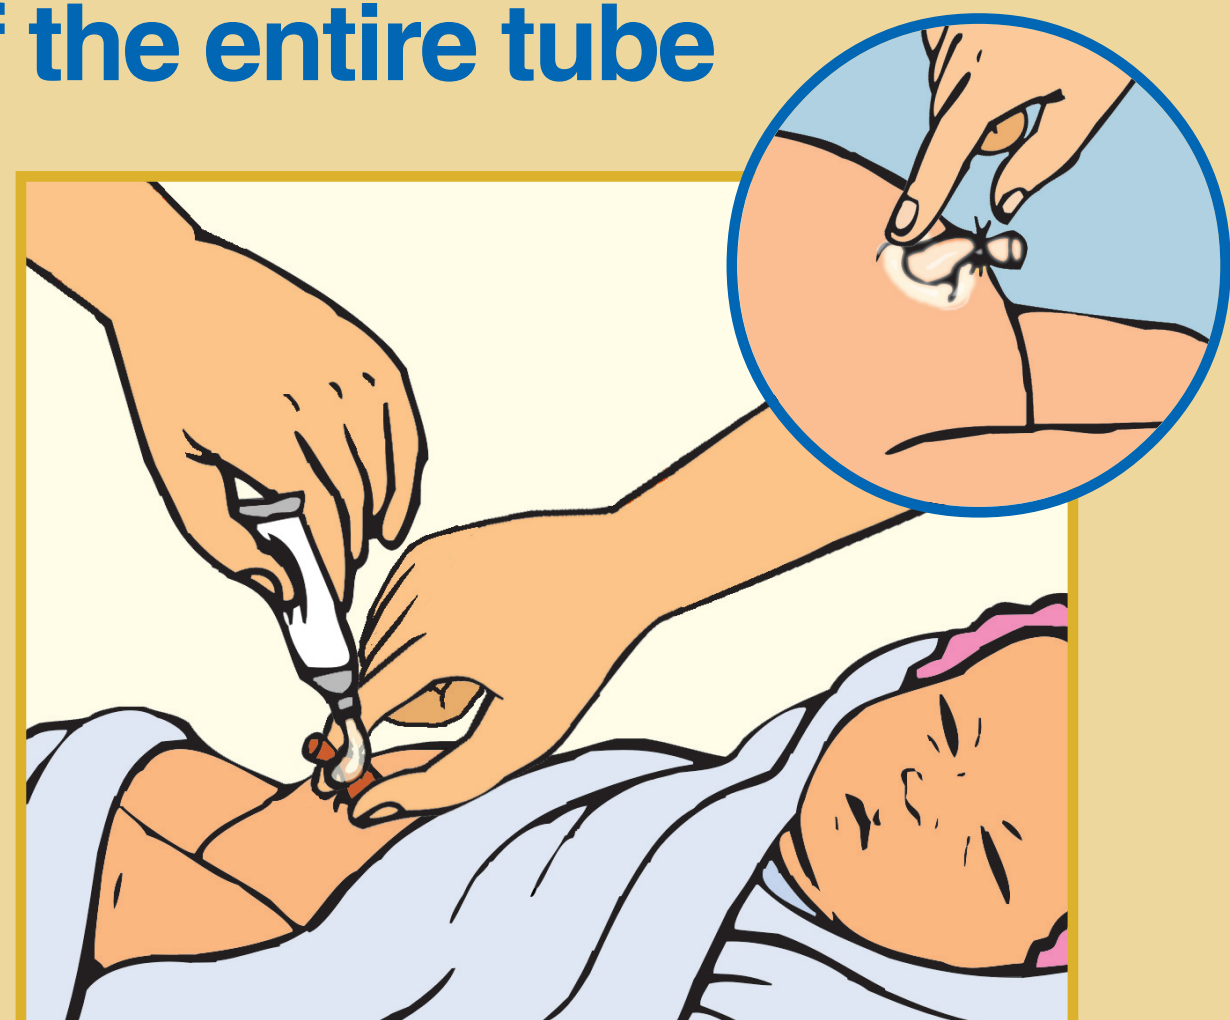

- CHX can prevent cord infection in newborn babies
- Apply CHX immediately after cord cutting
- Single application is adequate

Use the content of the entire tube

Wash hands properly with soap and water before application of CHX

Apply CHX on the stump and the surrounding areas of the cord

After applying CHX, apply nothing on the cord and keep the cord clean and dry
